

Rapid Migration Assessment

Accelerate your journey to the cloud with a Rapid Migration Assessment.

The Rapid Migration Assessment uses Azure Migrate to provide a comprehensive review of your organisation's server infrastructure and to provide guidance and recommendations on prioritising workloads to migrate to the cloud.

In an EIU study, respondents cited cloud computing as the technology that factored most prominently in their transformation efforts.

EIU study respondents cited cloud computing as the technology that factored most prominently in their transformation efforts.

Outcomes for your business

Empower your organisation to make server migration decisions backed by actual usage data and guided by experts.

Receive an end-to-end analysis and mapping of your in-scope server infrastructure, with IaaS and PaaS migration recommendations and sizing/pricing TCO estimates

Evaluate your overall infrastructure in relation to your on-premises and Microsoft Azure cloud strategy

Identify migration opportunities and best practices for deployment of Windows Server and SQL Server environments

Duration

- 2 weeks

Benefits:

- Certainty on where to begin your migration planning
- Alignment of cloud strategy to business needs
- Prioritisation of workloads for transition

How we help

Insight and Microsoft's team of Azure specialists will guide you through a 2 week engagement to conduct a comprehensive review of your infrastructure and databases and provide you with recommendations to help prioritise your workloads for migration to cloud. During the Data and Infrastructure Migration Assessment, we'll help understand and assess your business challenges, yielding the following deliverables:

- An end-to-end analysis and mapping of your entire IT infrastructure considering business goals, current deployment, usage, processes, and data
- Evaluation of your overall infrastructure in relation to your on-premises and Microsoft Azure cloud strategy
- Identification of migration opportunities and best practices for deployment in Windows Server and SQL environments
- Migration strategy options and sizing/optimisation opportunities and recommendations

Best for when you need to...

Overcome uncertainty on where to begin your migration planning

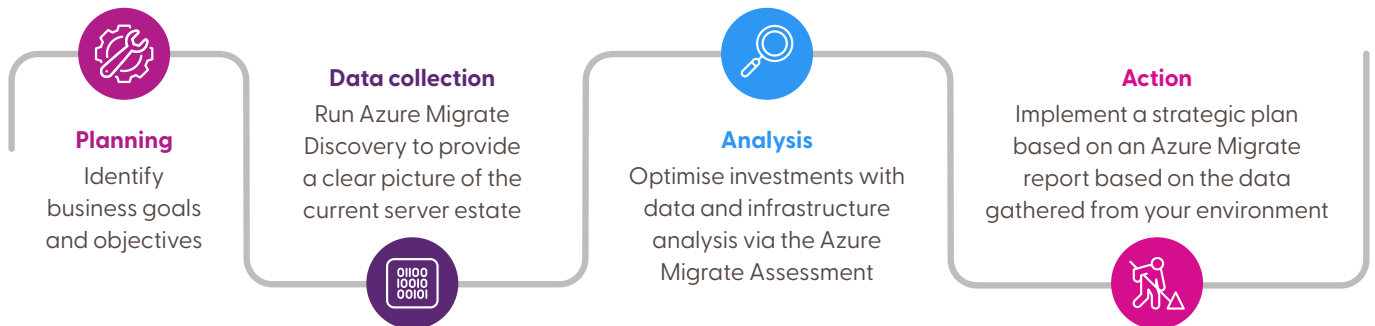

Develop a roadmap to migrate on-premise server workloads to the cloud

Resolve ambiguity around prioritising workloads for transition

Migrate confidently with expert help along the way

Our experts will guide you through our four-phased approach, from identifying your business goals to implementing specific action items. End-to-end assessment time is 2-3 weeks and typically involves less than 8 hours of time invested from your team.
