Secure Productivity for Microsoft 365

Learn how to secure productivity with Microsoft 365 and get your business AI-ready

Securing productivity with Microsoft 365 means maximising the impact of Microsoft 365 solutions while simplifying licensing, management, and vendor landscapes whist in a secure environment. Pressures from the evolving global economy are requiring organisations like yours to reduce costs, improve security, and optimise productivity and collaboration as they prepare their businesses for the era of AI. By delivering the Do More with Microsoft 365 workshop, we help customers identify cost savings and explore a proactive AI strategy to get their entire organisations ready for Microsoft 365 Copilot.

Securing Productivity with Microsoft 365 focuses on four areas of impact:

Setting up a strong Zero Trust foundation.
A Zero Trust strategy may look complex if you think about its entire architecture. But with a single integrated solution, you can secure and manage identities, defend against threats on multiple platforms while protecting information across your data estate, and finally, create a simplified IT environment with Microsoft 365 to free time for IT and security admins to elevate their focus for higher-value activities.

Streamlining endpoint management.
We will show you examples of how Microsoft 365 can improve support and reduce incidents, while empowering IT to deploy any endpoint from the cloud and delivering the best experience for users and support professionals with Windows 11.

Driving productivity and collaboration. We believe in energised and empowered employees. Let us demonstrate how to get everyone connected and working together from anywhere, at any time with Microsoft Teams. And how you can bring your data to life and create a sophisticated map with Semantic Index.

Elevating productivity with Microsoft 365 Copilot. Join us to discover a new way of working with Microsoft 365 Copilot to unleash creativity, unlock productivity, and elevate the skills of your teams.
