

Microsoft Purview Data Protection Accelerator

Prepare for AI and protect your
data with Microsoft Purview

Business Challenge

With the buzz of AI and the ability to surface content for insights, data protection has never been more important. More customer data and personal information is sitting within corporate systems, and external collaboration has become critical in driving business value. These requirements drive the need for enhanced protection, auditability and futureproofed controls, that can secure data as the business evolves.

How we help

Insight has created a **Microsoft Purview Data Protection Accelerator**, which rapidly deploys security controls into the environment aligned with best practices. In this 3-4 week engagement, our team walk through the best practice configuration, capture key design decisions around important sensitive information, subsequently deploying labelling and DLP controls to protect your information. Our team then work with your IT teams, to demonstrate usage of the platform and how to further enhance security capabilities when your organisation is ready.

Duration

- 3-4 Weeks

Benefits

- Best practice data protection deployment to start labelling and preventing data loss of sensitive information
- Structured engagement, enabling rapid deployment and time to value
- Internal teams enabled to operate the Purview platform, actioning DLP alerts and enhancing configuration

About Insight

Insight Enterprises, Inc. is a Fortune 500 solutions integrator with more than 11,500 teammates worldwide helping organisations accelerate their digital journey to modernise their business and maximise the value of technology.
