

Data Security Envisioning Workshop

Empowering Organisations to
Discover, Protect, and Govern
Data with Microsoft Purview

Overview & Problem Statement

In today's digital landscape, organisations face increasing challenges in managing and securing their data. Sensitive information is often hidden across environments, stale data accumulates, and insider risks pose significant threats. The Data Security Envisioning Workshop is designed to help organisations uncover hidden risks and strengthen their data security posture using Microsoft Purview's comprehensive suite of tools.

What to Expect

During this engagement, we will partner with you to strengthen your organisation's approach to data and discover hidden risks. You will gain insights into implementing Microsoft Purview features, including:

- Improving Compliance Scores
- Understanding sensitive information
- Identifying and removing stale data
- Data Classification
- Data Loss Prevention Policies
- Labels and Auto-Labeling Policies
- Retention Policies
- Automated Discovery & Data Privacy
- Insider Risk Management
- Assessment Templates

At the end of the workshop, participants will:

- A Security Check report with findings and insights
- A list of actionable recommendations to mitigate risks
- A clear view of Microsoft's data security approach
- Long-term compliance strategy recommendations
- Joint plans and next steps

Who Should Attend

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Chief Technology Officer (CTO)
- Technical experts working on the products
- Decision makers who need to understand product functionality

Duration

Customer Commitment: 3–5 hours
